

Pennsylvania Power Library

The Pennsylvania Power Library is provided as a service of the Pennsylvania public libraries and the Commonwealth of Pennsylvania.

The

The Access Pennsylvania database is a union catalog of participating public, school, academic and special libraries . This collection of over 6 million records allows for interlibrary resource sharing. This ever growing resource allows Pennsylvania's access to resources from any where in the state. These materials are provided through an interlibrary loan system originating at your local library. Check with your local librarian to access these resources.

Pennsylvania Power Library and Access PA

PA Power Library

Pennsylvania Power Library is a collection of over 40 unique databases available to Pennsylvania residents. These databases are available through a central Website at your public and school library. The Power Library is available remotely by logging into the James V. Brown Library and using your library card to gain access. These databases are also available on your school's network. You may gain access on any school computer.

The collection of databases provides unlimited searches of credible sources to meet any searcher's needs. The search results provide reliable information without the hassle of inappropriate results, including pop-up window sales.

Remote access available through the James V. Brown Public Library with the use of your library card.

Database Listings for Elementary Students

Novelist K-8

Novelist K-8 is a database that provides a listing of popular fiction titles for children in Kindergarten through eighth grade. Database includes picture books to chapter books searchable by: Title, author, plot, genre or books of similar interests.

Kids Search

This database allows young children to search by category and is icon driven. This child friendly search provides result listings with icons that give students a quick check for related photos, readability levels. Elementary students can find relevant information at their own reading levels based on lexile reading levels.

Searchasaurus

Searchasaurus is an exciting search tool for young children. Using animation and dinosaurs to provide fun and excitement to student searching possibilities. Searchasaurus offers results based on readability levels using the Lexile scale.

The Facts for Learning database encourages students to ask questions and utilize reference materials to help supply the answers. Content in Facts for Learning is derived from Weekly Reader, World Almanac, Gareth Stevens reference books, Funk and Wagnalls and Oxford Children's Encyclopedia using materials created by teachers.

SIRS Discover

The SIRS database provides full text articles that have been selected for educational content, significance and reading level. Articles are selected from over 1,200 magazines, newspapers and government documents.

Power Library provide safe, secure and educationally relevant searches for all students.
