I. Windows 10 Interface

The current operating system we are using is Windows 10. Previously, we used Windows 7 in the district.

A. What's New in Windows 10 Taskbar?

Main V	Vindows 1	0 Teskber /	Areie			
	Taskvier					
Start menu button		Microso	ft edge			
Cortana search	i box	File	Explore	ar WI	ndow	sstore
Ask me anything	4 0	е н	â	۲	۲	ø

- 1. **Start Menu Button**: The Start Menu looks drastically different from Windows 7. (Click on the start menu now and look the options. Then, click off of it and right click on the start menu and look at the options).
 - To log off Windows 10, you need to **right** click on the start menu and choose "Shut down or sign out" left clicking does not allow you to log off (although, it does let you shut down/restart).
- Cortana: It is supposed to be similar to Siri, where you can talk to this "virtual assistant" with your computer's microphone. (Although, I was unable to use the microphone function because there is a bug in the software. If you want to fix the bug, go to <u>http://www.pcadvisor.co.uk/how-to/windows/how-fix-windows-10-start-menu-3623893/</u>).
 - Cortana can also be used as a search bar without a microphone. \bigcirc
- 3. Task View: This feature makes it easy to manage all of your open windows. (Click on it now).
- 4. **Microsoft Edge**: It is the new browser software, replacing Internet Explorer. It is faster, more secure, and includes new features.
 - Microsoft Edge has some helpful new features, to learn about them go to (<u>http://www.howtogeek.com/222214/11-tips-and-tricks-for-microsoft-edge-on-windows-10/</u>)
 - My favorite is the "Reading View" feature, it strips the clutter from articles on the web and makes them more easily readable. To activate this feature, click the "reading view" icon in the address bar – on the right slide. The icon looks like a book.

- 5. **File Explorer:** Previously known as Microsoft Windows Explorer, allows you to view your files, folders, storage locations, etc. (Click on it now to locate your network drive).
 - If you do not see your network drive, click on "This PC"

- "This PC" will expand and you should be able to locate your network drive
- 6. **Windows store:** This will allow you to download both free and paid apps/games/music/movies, etc. (Right click on it now to unpin it from the taskbar, if you don't want it on your taskbar).

B. What Are Two Useful Features of Windows 10?

1. **Snap Assist:** This feature allows you to see/work in two (or four) programs simultaneously easily. (e.g. you can see/work on a web page and Microsoft Word at the same time)

To "snap" a program, click on the program's title bar (the title bar is the bar at the very top of the screen), hold your mouse down, and then drag it to either the left or right edge of your screen – then drop it. (Do it now).

2. **Pinning to the Taskbar:** Pinning something to the taskbar is just like having a shortcut on your desktop, but instead it's on the taskbar. There are two ways to pin, (1) drag an icon to the taskbar, (2) right click on an icon and choose "Pin to taskbar." (Pin the Microsoft Word icon to the taskbar now, it is located in the Common Programs folder in the Microsoft Office folder on the desktop).

- C. What Are Some Helpful Shortcuts in Windows 10? (https://quizlet.com/144709173/)
 - 1. Windows Key+D minimize apps to go straight to the desktop.
 - Windows Key+L locks your PC, you will need to key your password to unlock your PC (great feature to use when you walk away from your computer).
 - 3. Windows Key+E launch File Explorer (aka Microsoft Windows Explorer).
 - 4. Alt+Tab switch between windows. (Hold down Alt while tapping Tab to pick visually).
 - 5. **Ctrl+Alt+Tab** displays all windows.
 - 6. **Alt+F4** close the current window.
 - Ctrl+Alt+Delete brings up the task manager (warm boot) which allows you to close programs that are not responding.

- II. How to Disable the Start Screen (which appears when loading Word, Excel and PowerPoint)
 - 1. Load the software. Click on Blank document. (the screen captures below are using Microsoft Word)

2. Click on File (top left).

	÷ ک - ⊂					Document	1 - Word						ħ	-

4. Click OK.

That's all there is to it. Now you can repeat the process in Excel and PowerPoint. The next time you start each of these programs, you will go straight to a blank document.

III. How to Turn off "Enable Editing"

1 PROTECTED VIEW Be careful—files from the Internet can contain viruses. Unless you need to edit, it's safer to stay in Protected View.

Enable Editing

In Microsoft Word

1. Click on File (top left).

7. Click OK and click OK again.

Now you can repeat the process in Excel and PowerPoint to turn off enable editing in those programs.

IV. How to Remove Advertisements When Using YouTube

- 1. Go to Google and search for Adblock Plus Chrome.
- 2. Locate this link.

Adblock Plus - Chrome Web Store - Google https://chrome.google.com/.../adblock-plus/cfhdojbkjhnklbpkdaibdcc... ▼ Google Chrome ▼ ★★★★★ Rating: 4.5 - 111,820 votes - Free - Chrome Jun 28, 2016 - Adblock Plus is the most popular ad blocker ever, and also supports websites by not blocking unobtrusive ads by default (configurable).

3. Click on Add to Chrome.

4. Click on Add extension.

5. You will the see one of the following two screens. Regardless of which screen appears, Adblock Plus has been installed.

Screen #1

Or

Screen #2

If you see this screen you can make a donation or just close the screen.

V. Advanced Windows 10 -- Virtual Desktops

Instead of keeping everything open on the same desktop, you can move some of your windows to a virtual desktop to get them out of the way. This feature wasn't available in previous versions of Windows, and it is especially helpful for managing a lot of windows at the same time. To create a new desktop, open Task view (see page 2 to locate the Task view), then select New desktop near the bottom-right corner.

Once you have created multiple desktops, you can use Task view to switch between them. You can also move windows between desktops. To do this, open Task view, then click and drag a window to the desired desktop.

To close a virtual desktop, open Task view and click the X in the upper-right corner of the desktop you want to close.
